

SEPTEMBER 14 2026

AI LEARNING SESSION

Co-operative Marketing Partnerships Program
Sector Partner Meeting

BEFORE WE GO FURTHER

What we're not talking about

AI-generated public content

Chatbot recommendations

AI shouldn't replace human judgment or creativity.

That's my list. What's yours?

”

“AI, particularly ChatGPT, are often wrong on geographic locations, availability of consumer (including tourism assets) products, etc”

”

“Everything I do is great or right, always spins the angle I want to hear”

”

“Mostly concerned about "AI slop" and impacts on graphic and creative design”

”

“Sometimes, users fail to keep their human brain adequately involved in the process”

THE FRAME

LEVEL 1
Do it faster

LEVEL 2
Do it yourself

LEVEL 3
Do what you couldn't

The cheapest use of AI is doing your existing work faster.
The valuable use is doing work you could never do before.

LEVEL 1

Do it faster

LEVEL 1

Same work. Less time.

Real, and it's where almost everyone already is.

01

The riskiest tier

Operating without strategic safeguards creates maximum exposure to errors and unvetted AI outputs.

02

The lowest ceiling

Focusing solely on immediate speed gains limits the transformational value AI can offer your team.

03

Easiest way to get burned

Rushing automated responses without proper review quickly leads to public and operational missteps.

LEVEL 1

The worst use of AI: writing your public-facing story for you.

Don't let it write the story. Write your story.

Grant reviewers are seeing near-identical AI-written answers across submissions.

LEVEL 1

Level 1, done right

It's retrieval and assembly.

2026 MARKETING PLAN
ASSISTANT

[New conversation](#) · [Sign out](#)

WELCOME

YOUR 2026 PLAN, ANSWERED ON DEMAND.

ask anything

This assistant has the full 2026 marketing plan, research report, and marketing calendar at its fingertips. Ask about strategy, timing, audience, budget, or any detail you want clarified.

TRY ASKING

What are the top three priorities in the 2026 plan?

Walk me through the Q2 campaign calendar.

Who is the primary target audience this year?

What did the research report find about visitor motivations?

Ask about the 2026 plan, calendar, or research...

SEND

Answers are generated from the 2026 Marketing Plan, Research Report, and Calendar. Verify important details with your Junction team.

You own the outputs. The rights. The consent. The accuracy.

Human review is not optional.

LEVEL 2

Do it yourself

One partner project. One line item.

\$800

to place a single tracking pixel on a page.

LEVEL 2

What Level 2 covers

01

Website edits & fixes

Continuous technical updates, bug resolutions, and performance optimizations for your web platform.

02

Search visibility (SEO → GEO)

Evolving standard search engine ranking strategies into Generative Engine Optimization for AI answers.

03

Campaign & content production

End-to-end creation of targeted marketing assets, copy, and multi-channel campaign collateral.

04

Reporting & dashboards

Real-time performance tracking and detailed analytics reporting to keep key stakeholders informed.

I have the following Wordpress website: <https://wearejunction.com/>
I need to add a Meta tracking pixel.
Walk me through, step by step how to make that update.

Read a page, searched the web >

Your site is WordPress running Site Kit by Google, and it's a brochure/lead-gen site with no WooCommerce — so the simplest reliable route is pasting Meta's base code sitewide via a header-snippet plugin. One thing to check first: if Site Kit already has Tag Manager connected, use the GTM route instead so all your tags live in one place.

Install a header snippet plugin

In WordPress, go to Plugins → Add New, search for WPCode (formerly Insert Headers and Footers), install and activate. It's lightweight and won't touch your theme files, which matters because theme edits get wiped by updates. Avoid Meta's own "Facebook for WordPress" plugin unless you specifically want its built-in Conversions API — it's had a rocky history with updates breaking sites.

LEVEL 2

SEO → GEO

Search used to mean ranking for keywords. Now it means being the answer an AI gives.

Expedia and Booking.com have AI partnerships.

$$1/3 \rightarrow 2/3$$

of bookings, if we do nothing. Our margins go with them.

LEVEL 2

This feeds directly into the Iconics work.

The program is now Iconics-led, and Destination BC is developing GEO statements for each Iconic area.

LEVEL 3

Do what you couldn't

01

Key Trends

Five marketing insights shaping Canadian destination marketing this month, synthesized from eight industry sources.

CHANNELS

Short-Form Video is the New Discovery Channel

70% of Gen Z and Millennials now find their next destination through short-form video. A 15-second behind-the-scenes reel outperformed a professionally shot property tour by 340% on reach. TikTok Travel Ads launched in late 2025, making the platform a full-funnel conversion tool.

Dig deeper

STRATEGY

DMOs Shift from Brand to Performance

In 2025, 59% of DMOs globally said top-of-funnel awareness was their primary focus. In 2026, that dropped to 25% — a 34-point shift in one year. 79% of North American DMOs now say ROI and economic impact are their top reporting priorities.

Dig deeper

INFLUENCERS

Micro-Influencers Outperform Every Paid Channel

Micro-influencers (10K-250K followers) generate \$6 average ROI for every dollar spent — outperforming macro-influencers, traditional paid social, and display advertising. 82% of travelers trust creator recommendations over traditional ads. Booking conversion averages 5% vs 0.5% for display.

Dig deeper

CASE STUDY

Montreal's Marketing Playbook: Reality TV Campaign Drives Record Results

Tourisme Montreal's summer campaign, developed with Cossette, positions the city as a reality TV stage where visitors become stars. The "one island, six challengers" creative drove the city to 12.5 million visitors (record), 82% hotel occupancy, and record Jazz Festival attendance.

off

Why this matters: most operators who underprice aren't doing it on purpose. They're missing costs they never added up. Getting your volume assumptions right here means every dollar figure below will actually reflect your business.
